AZEK-to-Mill (ATM)

ATM's thick profile makes it an ideal material for fabrication. Its consistent density offers a superior product for milling operations.

Rabbeted Trim

With rabbeted edges, this one-piece trimboard is designed to ease siding installation and deliver a crisp facade.

Flange Slotted Trim

Typical window trims installed over a window nailing fin need to be shimmed or pulled back for the trim to lay flat. Flange Slotted Window Trim does not and is engineered to create consistent long-lasting window surrounds by removing the installation challenges created by windows installed with a nailing fin.

Cornerboards

With dirt-free seams that will not open, AZEK® Cornerboards offer faster and more aesthetically pleasing installations to complement any home exterior. Available in both classic White and with PaintPro Technology.

Rabbeted Cornerboards

With rabbeted edges, this one-piece cornerboard is designed to make siding installations a breeze and help deliver a crisp facade with smooth outside edges and dirt-free seams.

Quick Corner ®

The inner and outer quick corners are installed with hidden fasteners, completely eliminating the need for excessive face nailing and touch-up. It is also versatile enough to be used with multiple types of sidings.

J-Casing

J-Casing offers the most beautiful and seamless transition between your siding and trim. Engineered to reduce labor and save costs by eliminating paint and extra J-channel installs.

Universal Skirt Board

A two-piece skirt board with a two-sided trimboard (one side in smooth, the other in woodgrain) designed to assist with water management. Routed with a universal siding interface. Installation is quick and easy.

One-Piece Skirt Board

One-Piece Skirt Board is designed to eliminate purchasing and installing a separate starter strip, skirt board, and flashing while helping drain water away from the main structure. Save time and cost without compromising aesthetics.

Integrated Drip Edge

Designed to assist with water management efforts around doors and windows. Comes in two pieces with a two-sided trimboard; one side in smooth and the other in woodgrain. Easy to install, the drip edge has an integrated nailing flange to reduce installation time and costs.

AZEK PREMIUM SIDING
THREE DISTINCTIVE LOOKS, ONE SUPERIOR MATERIAL

AZEK Siding® choices offer style, durability, and low maintenance. The familiar looks of traditional wood exteriors meet the advanced engineering of ready-for-paint AZEK PVC. Water and moisture, wood's worst enemy, is no match for AZEK. Contemporary to farmhouse, colonial to coastal, AZEK siding is the best choice for both new construction and R&R.

Premium AZEK Bevel Siding

AZEK® Bevel looks so much like real cedar siding, it can repair and replace rotted cedar boards seamlessly. When it wraps an entire house, rot is a thing of the past. Installs with face nailing and without knots or finger-joints. Ready to paint without priming, AZEK Bevel creates a traditional look with the freedom of low, low maintenance.
